

# ZY-01 HORIZONTAL PULLING CAGE DOOR WELDING MACHINE

## Parameters: GWC190ZY-01

|                      |                                          |                  |              |                 |                                                           |
|----------------------|------------------------------------------|------------------|--------------|-----------------|-----------------------------------------------------------|
| Mesh width           | Hook center distance 140-250mm           | Cross wire space | 55-90mm      | Line wire space | 400-600mm                                                 |
| Number of electrodes | Side wire 2 sets<br>Middle wire 2sets    | Transformer      | 36KVA×2      | Wire diameter   | Line wire 4.0mm+<br>hook wire 5.2mm+<br>middle wire 2.8mm |
| Welding material     | Low carbon steel wire<br>Galvanized wire | Welding speed    | 8 Seconds/pc | Finished mesh   | panel mesh                                                |

## Standard Configuration

wire payoff, straightening roller, accumulator, straightening roller, feeding part, cross wire hopper, welding machine, automatic bending, automatic cutting, automatic stacking.
